PROFESSIONAL SUMMARY

Second-year Database Management student with strong academic performance and hands-on programming experience. Proactive team coordination and communication skills. Eager to apply database design principles and programming skills in a professional environment.

EDUCATION

Associate of Applied Science in Database Management (In Progress) *Expected May 2026*

Fayetteville Technical Community College, Fayetteville, NC GPA: 3.87

SKILLS

Programming Languages: Python, SQL, C++, HTML

Tools & Software: Microsoft Excel, Git/GitHub, VSCode

Core Competencies: Database Design, Database Query Construction, Spreadsheet, Code Debugging

PROJECTS

BAG Financial Tracker 2026

Flask Web Application

- Helped develop a finance tracker web app for college students
- Coordinated development and communication between face-to-face and remote members using best Agile practices
- Utilized AI tools, and audited generative code in development
- Oversaw and troubleshoot core database schema and design

Interactive Text-Based Games 2024 – 2025

Python, C++ & Twine

- Developed escape-room style games implementing complex data structures and control flow logic
- Designed branching narrative systems requiring careful state management and function organization
- Applied object-oriented programming principles to create modular, maintainable code
- Demonstrated proficiency in Python/C++ fundamentals and interactive program design

OTHER EXPERIENCE

Volunteer Fall 2024 – Present

Fine Arts Club, Fayetteville Technical Community College

- Provided customer service and managed transactions at college events
- Communicated effectively with students, faculty, and community members
- Assisted with event coordination and organizational tasks in a group environment
